THIS article is a new apparatus for the preparation of Soda Watter. It has been used for more than six years past, by the inventor and Proprieter, with entire success, and has also been compleyed during the seasons of 1836—7, and 8, by a number of other individuals in various parts of the United States, to whem it was not only given cutive satisfaction, but they have expressed themselves as highly gratified with its operation. It has also been submitted to the examination of several scientific gentlement, who have given favorable opinions in regard to it.

the small amount of labor required, and its compact form.

The Propositors are aware of the perplexities and inconvenience attending the manufacture of Soda Water with the complicates forcing sump and apparatus generally in u.e., especially in small cities and towns, where the sale of this heverage is limited, and consequently the luminess cannot be made profitable, owing to the original cost of an apparatus, together with the tremble and expense of keeping it in operation.

Rochester, February, 1808.
I have before made use of the old apparatus, by which the Fountains were charged with fines, from the Patent Gas Generator. During the past sammer, however, I used one of your Fountains with very great satisfaction. The advantages which I conceive your apparatus has over the old Fountains, are—

The safety and ease with which a constant supply can at all times be kept up.

The low price, as compared with the old one, being only about one-sixth the Arice of a Generator and Fountain.

The expease of perpeture the water for use, being not more than one-fourth as much as the old plan, while the labor is very much hisseard.

We have seed one of Mr. Swun's Atmospheric Soda Founiains, and are perfectly satisfied with its construction and operation. We said cheerfully recommend it to the notice of the public as the heapest and most concenient apparatus with which we are acquaint-d.

manufactured by them, and of which furthers have been sold within the last two months in this city. All who have seen and used them, acknowledge their superiority for light over all other Lamps—of which the great demand for them is evidence. They give as much light as three Gas Burners, and the expense is FOTV PER CENT LESS but the expense of Page. I would state as an instance of the difference of labor required, that in one day, with the labor of only replenishing the reservoir, I drew see a substance of the same product on the old plan would have required at least the charging of four fountains, which is attended with labor, less of time, and danger.

In towns and villages, where the demand is limited, the Atmospheric Fountain must, for these reasons, be entitled to decided preference.
